

## **Aquantia to Present at Pacific Crest Global Technology Leadership Forum**

**MILPITAS, CA – August 5, 2011** – [Aquantia](#), the leading developer of High Speed Ethernet connectivity solutions for cloud computing and large scale data center deployments, announced today that it has been invited to present at the [2011 Pacific Crest Global Technology Leadership Forum](#) at 1:00pm on August 9, 2011, in Vail, Colorado 2011, as part of a panel of leading companies speaking about the next wave in networking technologies.

“Aquantia’s market position is strengthening substantially as the industry moves toward important milestones such as the first-ever shipment of 10GBASE-T LAN-on-Motherboard servers later this year,” notes Aquantia vice president of business development Phil Delansay, who will present at the conference. “This conference is an important milestone in continuing to expand our exposure, and present our vision of the future for network topologies and trends in the cloud computing and mega data centers as we achieve further success with our customers.”

The Pacific Crest Global Technology Leadership Forum will be hosted at the Sonnenalp Hotel at 20 Vail Road in Vail, Colorado, on August 8 and 9, 2011.

### **About Aquantia**

Aquantia’s 10Gigabit Ethernet ICs are at the heart of cloud computing and large-scale data center deployments taking place today. This market segment is going through a very fast transition, with astounding growth in the total amount of compute power and the move to faster connectivity. This has in turn led to a new paradigm for 10Gigabit Ethernet all across the ecosystem. With its 10GBASE-T silicon products, Aquantia delivers to its OEM customers the most versatile and highest performance 10Gigabit Ethernet connectivity solution while providing lowest Total Cost of Ownership (TCO). Located in Silicon Valley, Aquantia is a venture-backed company, with strong tier-1 VCs and strategic investor support. For more information, visit [www.aquantia.com](http://www.aquantia.com).
